1.0 ACKNOWLEDGEMENT

First and foremost, we would like to express our sincere gratitude to our lecturer, Miss Wan Nor Syazana binti Wan Hashim, for her guidance, support, and valuable knowledge throughout the course OBM247 – Records Management for Office Professionals. Her clear explanations and continuous encouragement have greatly helped us understand the importance of proper records management in an office environment.

We would also like to thank Perpustakaan Awam Negeri Melaka (PERPUSTAM) for providing useful information and resources that assisted us in completing this assignment. The accessibility and organization of materials made our research process smoother and more effective.

Lastly, we would like to thank our classmates and group members for their cooperation, teamwork, and support. The sharing of ideas and efforts from everyone contributed greatly to the successful completion of this project.

2.0 INTRODUCTION

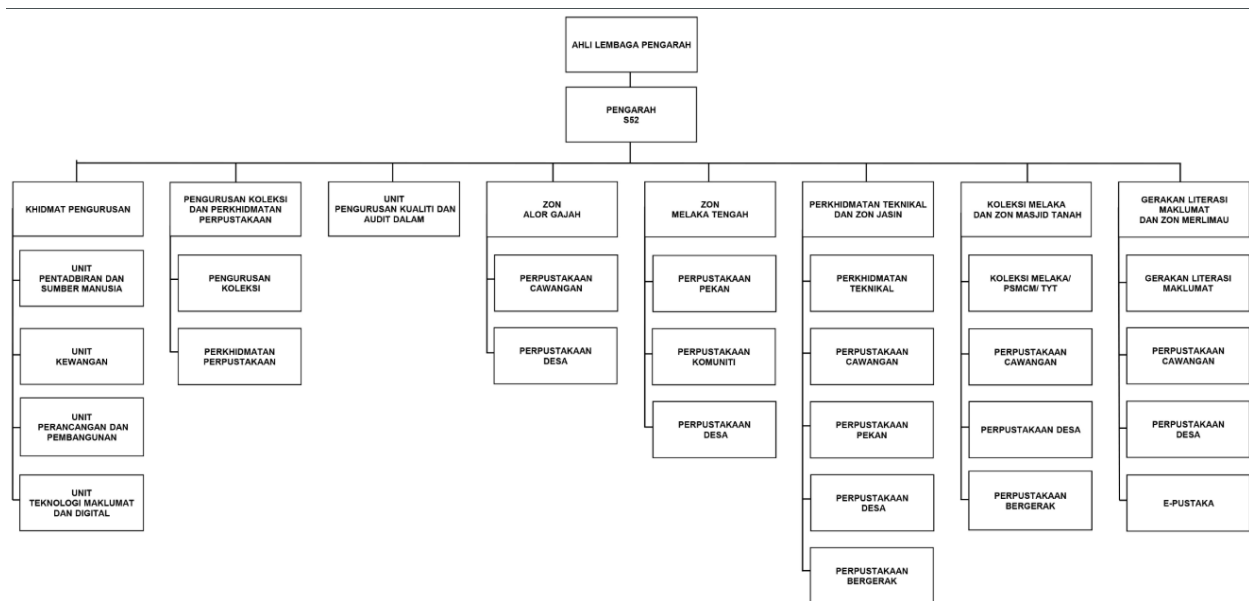

2.1 BACKGROUND OF THE COMPANY

Perpustakaan Awam Negeri Melaka (PERPUSTAM) is the official public library institution under the Melaka State Government. It was established to promote a reading culture, lifelong learning, and access to information among the people of Melaka. PERPUSTAM serves as the main knowledge and information hub for the state, providing various resources such as books, reference materials, digital content, and educational programs to support students, researchers, and the general public.

The main PERPUSTAM building is located in Bukit Baru, Melaka, and it also operates several branch libraries across different districts including Alor Gajah, Jasin, and Masjid Tanah. These branches help ensure that library services are accessible to communities throughout the state. PERPUSTAM is equipped with modern facilities such as reading areas, computer labs, discussion rooms, and children's sections to cater to users of all ages.

In line with technological advancements, PERPUSTAM has embraced digital services by offering online catalogues, e-resources, and internet access. Through continuous improvement and community engagement programs, PERPUSTAM plays an important role in supporting education, enhancing information literacy, and contributing to the intellectual development of society in Melaka.

2.2 THE ORGANIZATION CHART

2.3 THE OBJECTIVE OF THE COMPANY

The main objective of Perpustakaan Awam Negeri Melaka (PERPUSTAM) is to promote a strong reading culture and lifelong learning among the people of Melaka. It aims to provide easy access to quality information, knowledge, and educational resources for all levels of society, including students, researchers, and the general public.

Another objective of PERPUSTAM is to support education and academic development by offering a wide range of reference materials, digital resources, and learning facilities. Through its services and programs, PERPUSTAM helps improve information literacy and encourages self-directed learning.

In addition, PERPUSTAM aims to serve as a community knowledge hub by organizing educational activities, workshops, and outreach programs. By doing so, it contributes to intellectual growth, social development, and the creation of an informed and knowledgeable society in Melaka.

2.4 THE MISSION/VISION OF THE COMPANY

MISSION

PERPUSTAM is committed to providing accessible, high-quality information resources and library services to the community. It aims to support lifelong learning, education, and research through comprehensive collections, modern facilities, and digital services. PERPUSTAM also strives to encourage reading habits and information literacy by organizing educational programs and community outreach activities.

VISION

To become a leading public library institution that nurtures a knowledgeable, informed, and reading-oriented society in Melaka.

2.5 THE SLOGAN/MOTTO OF THE COMPANY

SLOGAN

- Slogan: "Di Sini Bermulanya Kisah Ceria Anda" (Here Begins Your Cheerful Story)

MOTTO

- Melaka Membaca (Melaka Reads)
- #BacaPERPUSTAM (Read PERPUSTAM)

2.9 THE HISTORY OF THE COMPANY

Perpustakaan Awam Negeri Melaka (PERPUSTAM) was established by the Melaka State Government with a simple but meaningful goal to make knowledge accessible to everyone. It was created to encourage reading and learning among the people of Melaka, regardless of age or background. At the beginning, PERPUSTAM operated on a small scale with limited space and resources, but it played an important role in serving the local community.

As the number of visitors and readers increased, PERPUSTAM continued to grow. The development of the main library building in Bukit Baru became a major milestone, providing a more comfortable and well-equipped space for students, families, and researchers. This expansion allowed the library to offer more books, better facilities, and a more welcoming environment for learning.

Over the years, PERPUSTAM has expanded its services by opening branch libraries in different districts such as Alor Gajah, Jasin, and Masjid Tanah. It has also adapted to modern needs by introducing digital services, online catalogues, and internet access. Today, PERPUSTAM is not just a library, but a community space where people come to learn, explore, and grow together.

3.0 ACTIVE RECORDS OR FILING SYSTEMS OR RECORDS SYSTEMS OF THE COMPANY

3.1 THE CATEGORIES OF SUBJECT FILES

HOUSEKEEPING RECORDS

Housekeeping records at PERPUSTAM refer to files related to the internal administration and general management of the organization. Although they are not directly related to PERPUSTAM's main functions, these records help daily operations and ensure the smooth running of the company. Four examples of housekeeping records which include:

100 - Meeting Management

200 - Buildings and Land

300 - Assets

400 - Finance

500 - Department

3.1.1 Meeting Management

Records related to the administration and documentation of official meetings conducted by PERPUSTAM. PERPUSTAM recorded 100 as meeting management in a coding system. These records include:

3.1.1.1 Notices and invitations to meetings

3.1.1.2 Meeting agendas

3.1.1.3 Minutes of meetings

3.1.1.4 Attendance lists

3.1.1.5 Decisions, resolutions and follow-up actions

3.1.2 Building and Lands

Records concerning the management, use and maintenance of PERPUSTAM buildings and land. For building and lands, this company recorded 200 in a coding system. These include:

- 3.1.2.1 Building ownership and lease documents
- 3.1.2.2 Floor plans, site plans and layout drawings
- 3.1.2.3 Maintenance, repair and renovation records
- 3.1.2.4 Utility service and maintenance contracts
- 3.1.2.5 Safety inspection and compliance reports

3.1.3 Assets

Records related to the management of PERPUSTAM assets, excluding library collections.

PERPUSTAM recorded 300 in their coding system as Assets. These records include:

- 3.1.3.1 Asset registers
- 3.1.3.2 Purchase documents
- 3.1.3.3 Maintenance and servicing records
- 3.1.3.4 Asset disposal and write-off records
- 3.1.3.5 Insurance and warranty documentation

3.1.4 Finance

Records related to the financial administration of PERPUSTAM. This company recorded 400 in their coding system as Finance. These include:

- 3.1.4.1 Budget proposals and financial planning records
- 3.1.4.2 Salaries and invoices
- 3.1.4.3 Purchasing for office furniture and equipment
- 3.1.4.4 Income and expenditure records

3.1.5 Department

Records related to the internal administration and operations of departments or units within PERPUSTAM. PERPUSTAM recorded 500 in their coding system as Department. These include:

- 3.1.5.1 Organizational structure and departmental functions

3.1.5.2 Internal administrative correspondence

3.1.5.3 Staff records

3.1.5.4 Departmental reports and activity documentation

FUNCTIONAL RECORDS

Functional records are subject files that document the core functions and main activities of PERPUSTAM. These records are directly related to the organization's primary role in managing information resources and providing library services. Functional records are important because they represent PERPUSTAM's objectives while assisting the offering of its services to customers.

There are eight examples of functional records that are include:

3.2.1 Book Purchasing

3.2.2 Recording and Classification

3.2.3 Membership and User Registration

3.2.4 Borrowing and circulation

3.2.5 Digital Library and Database Management

3.2.6 Documentation of Library Events

3.2.7 Programs and Literacy Initiatives

3.2.8 Information Services Policies and Procedure

3.2 FILING SYSTEM OR STORAGE METHOD OF THE COMPANY

PERPUSTAM uses a systematic physical filing system storage method. Documents are

kept in properly labeled filing cabinets and mobile shelves with files organized according to a subject based on the filing system. For housekeeping records in this company, they arrange all the records based on **block numeric filing system** followed by The National Archives of Malaysia system such as:

100 - Meeting Management

200 - Buildings and Land

300 - Assets

400 - Finance

500 – Department

EXAMPLE OF NUMERIC FILING SYSTEM THAT PERPUSTAM USED

3.3 THE TYPE OF SYSTEMS THEY ARE USING

PERPUSTAM uses a **manual record management system**, which mainly involves

printed and physical documents. Hard copy records are produced, handled and stored using manual system guarantees that official records are appropriately recorded and maintained in accordance with specified procedures. PERPUSTAM refers to the rules developed by the National Archives of Malaysia when handling its records. These resources offer specific instructions for document classification, filing procedures, record keeping periods and record removal. By following these rules, PERPUSTAM guarantees that its documents are properly maintained and arranged systematically.

3.4 THE PROCEDURES OF FILING THE RECORDS

For the procedures of filing records, there are three steps involved which include:

3.4.1: Step 1

Before opening a new file, first record all incoming letters in a mail registration record book. This registration process is carried out to ensure that every received document is properly documented and controlled. The details recorded usually include the date received, sender, reference number, and subject of the letter.

3.4.2: Step 2

After registration, the staff will examine the subject of the letter. If the subject already exists in PERPUSTAM's records, the letter will be filed under the existing file. However, if the subject is not found in the current records, PERPUSTAM will proceed to open a new file and register it accordingly. Before officially registering and opening the new file PERPUSTAM will be referred to the Head of Unit to obtain approval and instructions to ensure that file creation is authorized and aligned with organizational procedures. The staff will also determine the classification level of the file whether it is open confidential or confidential to ensure proper handling and security.

3.4.3: Step 3

Finally, the newly opened file will be categorized according to its subject and function that can maintain a systematic filing structure, improve retrieval efficiency, and ensure compliance with office management circulars and National Archives guidelines.

3.5 THE PERSON WHO IS IN CHARGE WITH THE MANAGEMENT OF THE RECORDS AND THE DUTIES.

In charge of the management of the records is Puan Rafidah as Records Management Officer at PERPUSTAM and with her assistance Puan Faridah Majid as the Administrative Unit who has received records management training. Their duties are receiving and registering all incoming and outgoing correspondence, evaluating document subjects to see if new files are required, getting the Head of Unit's approval before accessing files and categorizing records as open, confidential or secret are some of their responsibilities. Additionally, they are in charge of systematically organizing and storing files, which includes putting long-term records on mobile shelving systems, maintaining the integrity and condition of all records and making sure that Office Management Circulars and the National Archives of Malaysia guidelines are followed. Their job is to make sure that PERPUSTAM's records are safe, properly maintained, secure and easily retrievable.

3.6 RECORDS EQUIPMENT

To maintain confidentiality and stop unwanted access, important documents are stored in locked cabinets or **vertical file cabinet which have been crossed out**. For long-term records or records other than confidential records which are stored in a records room for storing records, PERPUSTAM uses **mobile shelves** systems as the main storage method. These mobile shelves are made to maximize storage capacity while maintaining proper accessibility and order. Historical documents, policy files, archival reports and important administrative records are examples of long-term records that are organized systematically on mobile shelves and clearly labeled by subject, year or record category. This method guarantees long term preservation, minimizes space usage and helps in record protection. Also they used CCTV at their special room where they kept confidential records.

EXAMPLE OF RECORDS EQUIPMENT

**MOBILE SHELVES FOR KEPT GENERAL
RECORDS**

**VERTICAL FILE CABINET THAT KEPT
CONFIDENTIAL RECORDS**

3.7 RECORDS SECURITY

To guarantee secure and well-organized storage, confidential files at PERPUSTAM are kept in a special allocated room with mobile shelving systems fitted with security shelves. To safeguard sensitive data, access to this space is strictly controlled. To ensure security, no CCTV is put inside the special records room but CCTV is installed outside and around the special records room's boundary. In order to improve security control while maintaining the privacy of the records kept within, these CCTVs are utilized to watch and record people coming inside and leaving out of the room.

3.8 Life-Cycle Of The Records Of The Company

At PERPUSTAM, the life cycle of records follows a systematic procedure to ensure the proper management, use and protection of records from their creation to their final disposition.

3.8.1 The first stage:

Record creation, in which records are created either within or received from other departments and entered into the official mail registration systems. Records are currently categorized by subject and security levels such as open, secret, or confidential.

3.8.2 The second stage:

Active use records that are regularly accessed for daily administrative or functional needs. Active records are kept in offices or filing cabinets for convenient access and reference.

3.8.3 The third stage:

Semi-active use, where records are used less frequently but still required for reference, audit or legal purposes. These records are usually transferred to storage areas such as mobile shelving systems to save office space.

3.8.4 The fourth stage:

Inactive or long-term storage where records that are no longer regularly used but have historical, legal or administrative value are stored securely in designated rooms using mobile shelves. Confidential records are kept in special rooms with controlled access to ensure security.

3.8.5 The final stage:

Disposition, where records are either destroyed according to approved retention schedules or transferred to The National Archives of Malaysia for permanent preservation.

4.0 THE PROCESSING OF MAILS OF THE COMPANY

4.1 INWARD CORRESPONDENCE

4.1.1 Receiving Mail

All incoming correspondence to PERPUSTAM is first received by the Record Department. This section ensures that every incoming mail is handled smoothly to avoid problems.

4.1.2 Registration

Every mail that is received needs to be printed for copy and mail is registered manually using a coding system. The registration process involves recording necessary details such as date, sender's name. This ensures and allows for easy tracking of mail.

4.1.3 Classification & Filing

After registration, the mail is classified into categories. The document is placed in the correct category and stored systematically to ensure it can be retrieved when required.

4.1.4 Distribution

Once classified, the mail is distributed to ensure that mail is delivered promptly to appropriate recipients. The person in charge of distribution needs to make sure that all the mail is delivered.

4.2 OUTWARD CORRESPONDENCE

4.2.1 Preparation of Mail

Outgoing correspondence is generated including reports, notices, and invitation that official approved format of PERPUSTAM.

4.2.2 Registration

Every correspondence is registered manually with necessary details such as name, address, reference number. This ensures that all the correspondence can easily be traced.

4.2.3 Filing Copies

All the outgoing correspondence needs to be copied for internal records before sending the mail. This ensures that the department saves the records for historical purposes.

4.2.4 Dispatch

And then the outgoing mail will be dispatched to the recipient and arranged for courier services and ensure it is securely dispatched to the recipient correctly.

5.0 THE MANAGEMENT OF INACTIVE AND LONG-TERM

At Perpustakaan Awam Negeri Melaka (PERPUSTAM), they organize their legal case file records into two classifications, inactive records and long-term records.

INACTIVE RECORDS

Records are considered inactive when they are no longer frequently used after a period of 3 years and are then subject to a periodic appraisal process to determine their value and appropriate action. The appraisal is conducted by the Records Administrator with the National Archives Disposal Schedule and typically takes approximately 3 months to complete. Following appraisal, disposition actions are implemented, whereby records approved for disposal are temporarily retained pending official authorization before being destroyed internally through shredding, while records containing confidential information require written approval prior to disposal. Records that continue to have administrative or reference value are either retained for a longer period or transferred to the record center, including completed administrative, procurement, and programmed files

LONG TERM RECORDS

Long-term records are managed under a centralized records management system to ensure proper control, preservation, and accessibility. These records include building-related files and selected personal records that are retained for extended periods, in some cases up to 20 years or more. To maintain physical organization, new files are opened once existing files reach a thickness of 4 centimeters. Records requiring long-term retention are transferred to the record center, where access to confidential records is restricted to authorized personnel in accordance with established security and archival procedures.

6.0 COMMENTS/SUGGESTIONS/RECOMMENDATIONS

The Records Storage Room of the Melaka Library is, from observations, a room set aside for administrative and archiving storage. Records are centrally held with limited access, which indicates that the basic principles of records protection (NAA 2003 Act 629) are being observed. But there is still much that can be done in terms of written procedures and environmental controls to guarantee the long-term preservation and legal compliance.

Therefore, Melaka Library should established the written Standard Operating Procedures (SOPs) that stand for procedures and systems on creating, maintaining, storage, transfer and disposals of records. These procedures are vital to standardize routine practices and comply with the provisions of the NAA 2003 as regards public offices' responsibilities in controlling official records based on guidelines developed by ANM.

Additionally, it is advised that the library follow an approved Records Disposal Schedule. Section 25 of the National Archives Act 2003 prohibits the disposal of public records without authorization from the National Archives of Malaysia. Implementing the disposal schedule correctly will reduce the risk of non-compliance with legislative obligations and prevent unnecessary record retention.

From a security perspective, we see a lack of ethics because the staff's seats are very close to the record storage room, this can cause pests to easily enter because they are close to the food that the staff eats while working. In addition, the trash can is also placed in front of the door of the record storage room, although it makes it easier for employees to throw away trash because it is close to them, however this can make it easier for pests such as ants to be close to the records that are stored and can increase the risk of damaging records and files.

Finally, library staff should get regular training on how to follow the law and keep records management. This helps ensure they properly understand their obligations when handling public records and can completely comply with the Official Secrets Act 1972 and the National Archives Act 2003 (Section 629).
